SA Housing Supply & Infrastructure Readiness Dashboard

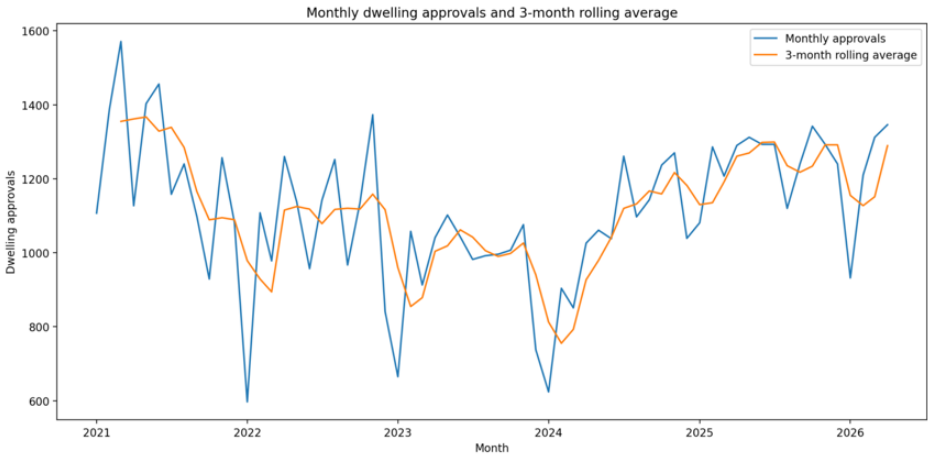

This dashboard is a Business Analyst portfolio project that explores housing pressure and housing supply indicators in South Australia using public datasets.

Suburbs analysed	Highest median rent	Average median rent
641	\$1,000	\$528

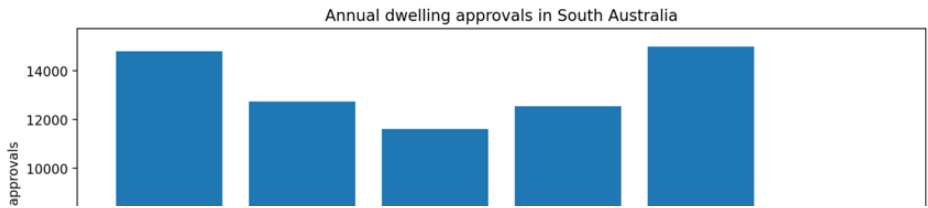

Top 10 suburbs by median rent

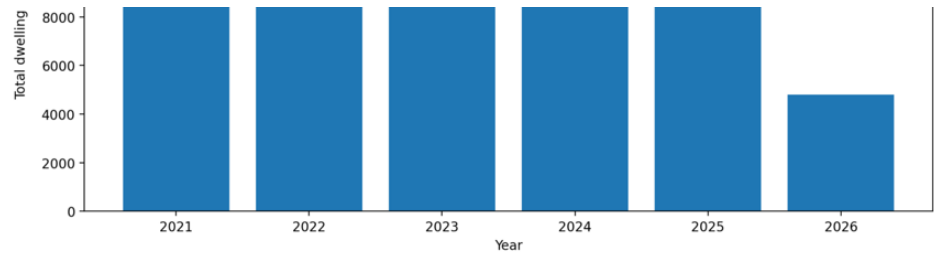

Monthly dwelling approvals in South Australia

Annual dwelling approvals

BA interpretation

Rental pressure and dwelling approval trends are analysed together to support early identification of housing supply pressure. The current version uses suburb-level rent data and state-level approval trends. A future version should add LGA-level approval data to support direct location-based comparison.

Rent pressure data

	Suburb	Unit Total Median	House Total Median	Total Median	Total Count	Rent_Pressure_Cat
0	Panorama	None	1000	1000	None	High
1	Heathpool	None	1000	1000	5	High
2	Stonyfell	None	1000	1000	None	High
3	Stirling	None	970	970	None	High
4	Belair	440	930	925	None	High
5	Red Banks	None	900	900	None	High
6	Terangie	570	1000	887.5	None	High
7	Netherby	415	1300	857.5	None	High
8	Uraidla	None	850	850	None	High
9	Gilberton	515	1100	842.5	10	High
